I'm looking for an internship or a junior role in ERP and CRM implementation. I have two and a half years of experience developing and implementing systems for clients. I adapt Odoo modules for inventory and customer follow-up, then test them against examples from the team's daily work.

Project experience

NeuroSupport · Odoo implementation for equipment logistics

- Adapted existing modules so the logistics team could track equipment requests, deliveries, returns and stock consumption in Odoo.
- Completed three end-to-end tests of the WhatsApp integration and simulated equipment movements. Validation in clinical operations is still pending.

Agenc-IA and Hinco · ERP and CRM

- Built Agenc-IA as my own project. For Hinco, I adapted customer follow-up and inventory workflows. Both ERP implementations are on hold.
- Connected business tools through APIs and webhooks, tested the workflows and deployed services with Docker on a virtual private server.

Horus Optic · E-commerce development and sales analytics

- Built the online eyewear store and its admin panel in Next.js. The initial build ran from July 2025 to January 2026 and covered the catalog, cart, appointment booking and Wompi payments.
- Created read-only SQL views in PostgreSQL and used Power BI to analyze sales, orders, average order value and best-selling products.

Colegio Santa Rosa de Lima · Remote IT support · Since July 2019

I provide Google Workspace support to the school and set up its professional email accounts.

Technical skills

Functional implementation. Odoo, ERP and CRM, requirements analysis, module configuration and adaptation, inventory management and functional testing.

Data and integrations. SQL, PostgreSQL, Supabase, APIs, webhooks and AI-assisted development. Basic Python and JavaScript.

Education and languages

Computer Engineering · Universidad de Catalunya. Coursework completed. Internship and degree award pending.

Vocational qualification in Computer Systems · Centro Educativo San Pablo.

SQL Associate · DataCamp, earned May 2024.

Languages · Spanish (native) and English (B1).
